INGLEWOOD COMMUNITY GARDEN

1. Overview of the Garden

INGLEWOOD COMMUNITY GARDEN

The diagrams in this guide have been linked to higher resolution PFD files on the Inglewood Community Garden website: clicking on them should open a window in your internet browser and display the PDF.

Also you can visit ... <https://inglewoodcommunitygarden.ca/publications> ... and scroll down to **Graphic Gallery** for a slide show of images.

2. The start of the Gardening Season

Opening Day

- The Garden's "traditional" official Opening Day for the Gardening Season is **April 30**
- If conditions are conducive you are welcome to attend to your plot before the official opening day but please note that there will be limited amenities or support prior to that date.

In-person Orientation

- Gardeners and Volunteers new to the Inglewood Community Garden are required to attend an In-person Orientation before planting their plot or working by themselves in the Garden.
- In-person Orientations typically take less than 30 minutes and are essential to making the best start in the Garden.
- Attendance at an In-person Orientation session is "come as you are" – no advance reservations are required. However attendees are encouraged to arrive promptly.

In-person Orientation Dates and Times

- Will be emailed to all new gardeners and new volunteers and posted on the ICG Events calendar as soon as they are determined.
- Typically they occur on at least two dates sometime between mid-April and mid-May

Why do I need an orientation?

- Practical information regarding the resources and garden practices will enhance your gardening experience and get you off to a proper start.
- An In-person Orientation will confirm your *informed consent* to the ICG Liability Waiver and thereby limit the insurance exposure of the Garden, the Board of Directors of the Inglewood Community Garden and the Inglewood Community Association.

Returning Gardeners

Returning Gardeners should be comfortable conducting an In-person Orientation for family and friends. As an aide to doing so a printed copy of this document – in a three ring binder labelled: **ORIENTATION BINDER** – along with blank copies of the ICG Liability Waiver will be placed in the Tool Shed for the convenience of anyone undertaking the process.

3. The Garden and Surroundings

The present garden was established when the Victoria Park relocated in 2003.

The Garden Path Society of Calgary, which was formed to manage the community garden and is now moribund, was a local non-profit organization active in Inglewood between 2003 and 2014 (approximately).

The Inglewood Community Garden adopted the Garden Path Society Mission Statement

To provide an organic garden to cultivate plants, build community and share our resources.

The Inglewood Community Garden adopted the Garden Path Society Vision Statement

We will be widely recognized as a vibrant, welcoming, all-inclusive society. We will engage the community through gardening to create a sense of harmony, pride and ownership. We will be financially, organizationally and environmentally sustainable.

The Inglewood Community Garden (ICG) leases the garden's land from the Inglewood Community Association (ICA) who in turn lease it from the City of Calgary.

3.A Hours of Operation

All public facilities in the garden are available to gardeners during the Garden's "normal hours of operation", which, during the Gardening Season, are from...

1 hour **before** sunrise until 1 hour **after** sunset

Three considerations have been used to determine the Garden's 'normal' hours of operation:

1. Safety
2. Security
3. Common courtesy
4. Well, four considerations... if you count common sense

3.B The Neighbourhood

2297 17th Street SE
Calgary, AB, T2G 1E7

All the Garden's contact information and a Google map of its location may can be found at this link:

Contact Information

inglewoodcommunitygarden.ca/contact

The Neighbours

Homeowners to the east and west are the garden's residential neighbours, there are two elementary schools to the north (Colonel Walker Community and Piitoayis Family Schools) and the Slovenian Canadian Club and Inglewood Community Association to the south.

There are two lovely greenswards adjacent to the north and south of the garden and substantial dog walking parks to the north-west.

3.C Parking at the Garden

The white parallelogram in the image above indicates a convenient location for angle parking

Vehicular parking for the garden is available on 22nd Avenue SE – the unpaved road leading to the Garden's east gates from the bend where 17th Street SE turns into 20th Street SE ... or vice versa. Angle parking along the school playground fence is recommended.

Please do not park in front of the vehicle gate on the east side of the garden **except** to drop off gardening supplies. The east side gate is generally used for bulk deliveries which are sporadic [and, admittedly, infrequent] in the nature of their arrival.

3.D Around and about outside the Garden

South Side: Parks Calgary and Inglewood Community Association

The green space immediately to the south and east of the ICG is maintained by Parks Calgary – whose rules pertain there.

Adjacent to the Parks Calgary ground the Inglewood Community Association (ICA) is a social, sporting and cultural mainstay of the community.

If you are a resident of the community and you are interested in obtaining a membership to this most worthwhile of associations check out the following link or contact the ICA office at the northwest corner of their building.

ICA website

www.icacalgary.com/

West Side: Residential Alley

Parking restrictions in the alley, according to City of Calgary by-laws, can be found in Section 27 of the following document:

Traffic Bylaws

[Documents/Legislative-services/Bylaws](#)

North West: Dog Walking Parks

There are modestly extensive Dog Walking Parks to the west-northwest of the Garden, see above, [The Neighbourhood](#).

Also, please be advised that the dog walking parks are quite well attended and that your dog is very likely to encounter other dogs.

Dog Walking Bylaws

[/Bylaws-by-topic/Dogs](#)

North Side: School playgrounds

Piitoayis Family and Colonel Walker Community School playgrounds are open to the public with the usual conditions that NO dogs are permitted on the grounds – leased or otherwise ... despite what you might actually see transpiring there..

For hours of access please consult the Calgary Board of Education website.

East Side: 22 Avenue SE and parking

The ICG “parking lot” – angle parking near the south side of the school playground fence: but **not** on the grass, please.

3.E Picnics and Social Gatherings

The Board of Directors would like nothing better than for gardeners, volunteers and the public to see the Inglewood Community Garden as a destination for family and social activity.

There are several picnic tables and log benches on the east side of the Plot Rental garden.

This gathering area is conveniently located and benefits from the shade of the stately Poplar trees nearby ... one of which sadly blew down in July of 2018 ... this area is a most agreeable spot to take a break from gardening and relax.

Gardeners are welcome to re-arrange the tables to suit themselves and / or their parties.

On the other hand, **all** the log benches want to remain where they are.

Smoking

Smoking in the Garden is **not** permitted.

Gardeners who smoke in areas adjacent to the garden are obliged to **remove** their cigarette butts.

Smoking adjacent to the garden poses a fire hazard due to the normally dry condition of the grasses there during summer ~ please exercise due caution.

Open Fire

Under **NO CIRCUMSTANCES** are gardeners permitted open flames or fires in the ICG!

3.F Pets in the Garden

Are pets allowed in the Garden?

Yes . . . **BUT!** . . . you are required to comply with the following list regarding care and control of animals in the garden.

Pet Safe Requirements

1. Dogs must be on a leash at all times.
2. Cats must be on a lead at all times.
3. In short, any animal that cannot be kept securely in a pocket must be physically attached to its companion or fixed to an immobile object.

Additional Considerations for Pets in and near the Garden

First of all, the Inglewood Community Garden is **NOT** a Petting Zoo, it is a community garden.

Please keep in mind that other gardeners may not find your pets as charming or personable as you know them to be.

In deciding whether or not to bring your pet to the Garden please consider that the safety and tranquility of your fellow gardeners as being paramount in your determination.

Any pet which disturbs the equilibrium of the Garden will be asked to leave.

NOTE: City of Calgary Bylaws prohibit dogs from school playgrounds ... regardless of what you see next door in the Colonel Walker playground.

There are modestly extensive Dog Walking Parks to the west-northwest of the Garden, see above, [The Neighbourhood](#).

Also, please be advised that the dog walking parks are quite well attended and that your dog is very likely to encounter other dogs.

4. Procedures in the Garden

As Calgary's largest contiguous community garden – as far as we know – it often seems that we are managing a small business rather than a garden and consequently have instituted as many administrative and operational procedures as were deemed practical and necessary... in order to let “the system” do some of the procedural work and reduce the workload on the volunteers who run the place.

The Garden, like the vegetation within it, is an evolving entity and its sustenance and sustainability are matters of ongoing concern and evaluation by the board of directors.

All of which is to say that we've tried to make as few rules as possible, tried to keep them simple, transparent and try to apply them fairly.

The following pages contain some of the processes we believe help us manage the Garden more effectively... if you think that any aspect of them can be improved or if we have overlooked a process entirely (!) please discuss your insights with us.

Input via email

info@inglewoodcommunitygarden.ca

4.A Orientation and Liability

Why is orientation necessary?

Two main reasons:

- So that new gardeners get off to the best start at the beginning of the season and
- So that we have everyone's *informed consent* to the Inglewood Community Garden Liability Waiver

The Orientation Guide can be found on our website at:

- <https://inglewoodcommunitygarden.ca/guides/>

and a printed copy can be found in the Tool Shed in the Orientation Binder.

Everyone who has had an in-person orientation is qualified to conduct one.

Liability – Liability Waiver – Liability Waiver Forms

In order to reduce the potential insurance exposure of the Inglewood Community Garden (ICG), and the Board of Directors of the ICG, as well as the Inglewood Community Association (ICA) we require that everyone gardening, volunteering or working in the garden sign our Liability Waiver. In order that you are able to give your *informed consent* to our Liability Waiver we further require that everyone gardening, volunteering or working in the ICG be adequately oriented to the ICG's safety provisions, best garden practice and code of conduct.

The ICG Liability Waiver can be read at the following link on our website:

- <https://inglewoodcommunitygarden.ca/liability-waiver/>

The ICG Liability Waiver can be completed online by filling out and submitting the form which can be found at the following link:

- <https://inglewoodcommunitygarden.ca/publications/liability-waiver-form>

Printed Liability Waivers and orientations

There ***should*** always be some printed copies of the Liability Waiver in the Orientation Binder in the Tool Shed. If you have a colleague, friend or family member fill out one of the printed Liability Waivers please leave the signed copy in the binder. You will notice that the printed copies of the Liability Waiver have a space to indicate who conducted the orientation and the date it was conducted – any gardener or volunteer who has had an orientation is qualified to conduct one.

4.B Supporting the Garden: Contributing your time

Why do I have to volunteer!?

Actually ... you don't! You can add 5 times the current **minimum hourly wage** in Alberta to your annual Plot Rental Fee instead.

Otherwise ...

- Because we are a “community” garden
- Because we need the help
- Because plot rental fees do not come close to paying for the upkeep required
- Because 5 hours **per plot** over 6 months... seems rather reasonable

This time commitment is on a **per plot basis** not a per gardener basis.

Therefore, if you're gardening with a partner... a friend, friends... or a family: well, you get the picture, individual contributions **all accumulate** to the plot's total.

4.C Maintenance of the Garden

We always need help maintaining the Garden. Lots of help.

The simplest way to help maintain our garden is to keep the surroundings of your plot free of litter and garden debris.

Coiling up hoses when you're done with them, putting tools back in their proper abodes, will go some way to helping as well.

If something is in need of repair and you can't fix it or want specialist help to fix it ... please let us know. Thanks.

M a i n t e n a n c e

info@inglewoodcommunitygarden.ca

4.D Plot Rentals and How to rent a plot

The Plot Rental Garden portion of the Garden comprises “about” 112 raised bed wooden plot boxes.

A standard above ground plot box is 4 feet wide and 12 feet long and about 14 1/2 inches tall [Metric: 1,219mm wide, 3,658mm long and 368mm tall].

Of all the plot boxes there are 5 more easily accessible above ground plot boxes which are 3 feet wide, 12 feet long and about 21 3/4 inches tall [Metric: 914mm wide, 3,658mm long and 553mm tall].

Plot Rentals in the Garden

Rather than recapitulate the fee structure for plot rentals, associated plot data and other plot rental details here, the interested reader is directed to a detailed discussion of them, which can be found at the following link:

Plot Rentals and Data

inglewoodcommunitygarden.ca/plots

If you want to just “cut the chase” ... inquiries regarding the availability of plot rental should be directed to our online contact form, which can be found at the following link:

Plot Rental Inquiries

[ICG Contact Form](#)

4.E Garbage and Litter Removal

Repetitio est mater studiorum.¹

Ergo...²

There is **NO** garbage **collection** provided by the Garden!

There is **NO** garbage **collection** provided by the Garden!

There is **NO** garbage **collection** provided by the Garden!

There is **NO** garbage **collection** provided by the Garden!

There is **NO** garbage **collection** provided by the Garden!

Aequē...³

There is **NO** garbage **removal** provided by the Garden!

There is **NO** garbage **removal** provided by the Garden!

There is **NO** garbage **removal** provided by the Garden!

There is **NO** garbage **removal** provided by the Garden!

There is **NO** garbage **removal** provided by the Garden!

And that is all the Latin you are going to see on this page.

Weeds are considered to be **garbage** and should be removed from the Garden by individual gardeners.

It is also much appreciated that gardeners' pick up and remove litter and gardening debris from around and about their own rental plot.

¹Repetition is the law of learning

² Therefore

³ Equally

4.F Composting in the Garden

The following comments are part of an ongoing discussion, your participation is welcome.

Ideally – composting (in some form) is an integral part of the gardening cycle.

Should there be a “garden wide” composting program in the ICG?.

- Possibly ...

Is there a composting program in the ICG?

- Yes... but it is limited.

Ideally – a composting program in the ICG should be able ...

- To compost all plant materials generated in the garden
- To compost all plant materials with a minimum amount of labour
- To produce compost from the source material within a seasonal cycle
- To distribute all composted material to the garden at the end of the seasonal cycle

The singular “problem” with managing and maintaining a “garden wide” composting program in the ICG is a matter of scale: the Plot Rental and Communal Gardens simply produce more material than we are capable of composting...both in terms of equipment and labour.

The ICG board of directors – in consultation with experts in the discipline – continue to evaluate specifications for state of the art composters, accepted best practice and are more than willing to entertain informed input.

Any updates to the compost program's operational status will be conveyed through the Monday Update Newsletter and Events Calendar postings.

However, until such time that a notice of a general resumption of the Garden's Composting Program is given, please ...

... remove all plant material from your plot and dispose of it personally.

5. Safety and Well-Being in the Garden

- **DO NOT RELY** on the First Aid Kits for a sense of security, rely on your common sense
- Know the garden's street address and the locations of the nearest Emergency Treatment Centre and the nearest pharmacy. The Garden's street address is: **2297 – 17th Street S.E.**

Emergency Treatment Centre: **Sheldon M. Shumir Centre**

1213 – 4 Street SW

~ approximately 4.6 km: 10+ minutes by car (in light traffic)

Pharmacy: **Marshall Drug Store**

1231 – 9 Avenue SE

~ approximately 1.6 km: 3 to 5 minutes by car (in light traffic)

Note: First Aid Kits **DO NOT** contain an epinephrine injector!

When you are working in the Garden the following will help ensure a pleasurable visit to the Garden as opposed to a pleasurable visit to Emergency Care or the local pharmacy:

- Proper clothing – for both heat and cold
- Sandals and open-toed shoes are a **hazard** when working in the Garden, especially if you are using hand tools such as shovels, spades or garden forks
- **NOTE:** You **may not** be permitted to volunteer in the Garden on behalf of the ICG if you are wearing sandals or open toed shoes, depending upon the task at hand
- Pay attention to the weather
- Make certain to drink enough fluids
- Be knowledgeable about the use of the tools
- Exercise appropriate limits to your physical ability

NO SMOKING in the Garden!

Smoking is permitted 5 metres from the Garden's gates

Thank You, in advance, for removing your cigarette butts

5.A First Aid Equipment in the Garden

INGLEWOOD COMMUNITY GARDEN

Note: First Aid Kits **DO NOT** contain an epinephrine injector!

There are two First Aid Kits stored in the Garden.

1. One First Aid Kit is stored in the **Tool Shed** – on the top shelf immediately on your right as you enter the shed
2. The second First Aid Kit is stored in the **Communal Garden Shed** – on the wall board facing you as you enter the shed.

Please lay the First Aid kits their backs before opening them, otherwise their contents may spill.

5.B Fire Extinguisher in the Garden

INGLEWOOD COMMUNITY GARDEN

Because the garden stores flammable materials in the **Maintenance Shed**, uses a propane BBQ and very occasionally employs a “tiger torch” to burn weeds – we keep a fire extinguisher on a small shelf attached to the outside of the north wall of the **Communal Garden Shed**.

The fire extinguisher in the garden has never been used and we would like to keep it that way.

5.C Emergency Water Shut Off in the Plot Rental Garden

INGLEWOOD COMMUNITY GARDEN

The **Emergency Water Shut Off** for the Plot Rental portion of the ICG is located inside a box set into the ground about 5 metres due east of the **Tool Shed**.

A metal lid set at ground level must be removed to gain access to the **Emergency Water Shut Off** valve.

Use this shut off valve if there is any kind of uncontrollable water flow in the Plot Rental Garden.

After you have used the **Emergency Water Shut Off** please contact us as soon as possible via the one of the following:

Phone	403 – 829 - 1947
Text	403 – 829 - 1947
Email	chair@inglewoodcommunitygarden.ca

6. Infrastructure in the Garden

As far as community gardens in Calgary go ... the ICG is pretty big. You may have noted that elsewhere in this guide we claim to be the “largest contiguous community garden” in Calgary: Size may matter but it is certainly not what is most important to the ICG.

Due to its physical size as well as the number of gardeners and volunteers the ICG serves it has to contain quite a bit of infrastructure.

The more obvious examples of this infrastructure are the fence, gates, buildings, water stands, hoses, watering cans, plot boxes (above and in-ground) and gardening tools.

It has taken since 2003 to establish the infrastructure that exists in the Garden today.

Our “strategic goal” is not to have more infrastructure but, where possible, to refine and improve the infrastructure we have inherited.

Please feel free to employ and enjoy the wherewithalls which the Garden provides for your gardening endeavours by making use of them in ways which ensure their continued utility.

6.A Gates

Gates – walls work better with them.

- All of the gates have combination locks.
 - As for the lock icons: Green means **GO** – Red means **NO**
- **DO NOT DRIVE INTO THE GARDEN.**
- Please do not park in front of the East Vehicle Gate.
- Use of either of the vehicle gates is limited to the delivery of bulk materials, soil, compost, lumber, maintenance equipment and so on.
- If you are delivering bags of soil, compost or other personal materials please feel free to park in front of the vehicle gates **temporarily** and make use of the wheel barrows to move your materials from the parking lot into the garden. Thanks.
- Please close the gate behind you whenever you use them. You do not need to lock them, simply latch them.
- If, however, you are the last person to leave the Garden, please make sure to lock the gate.

6.B Buildings in the Garden

INGLEWOOD COMMUNITY GARDEN

There are six buildings inside the garden's fence, four sheds and two green houses and a Porta-Potty, outside, adjacent to the southeast corner of the fence:

All of the sheds have combination locks, the green houses do not

- As for the lock icons: Green means **GO** – Read means **NO**

Combinations for the **Tool Shed**, **Communal Garden Shed** and **Porta-Potty** are the same as the combinations for the locks on the publicly accessible gates [see [6A. Gates](#), above].

The **Maintenance Shed** and the **Storage Shed** locks have different combinations as a safety precaution because they house power tools and equipment not required for everyday gardening use.

6.C Plot Rentals in the Garden

INGLEWOOD COMMUNITY GARDEN

In terms of longevity, the Plot Rental Garden is the most well established section of the Inglewood Community Garden.

The Plot Rental Garden moved to its current location from Victoria Park in 2003.

The Plot Rental Garden occupies about 0.43 acre / 0.174 hectare on the northern side of the Garden, adjacent to the Colonel Walker Community and Piitoayis Family School playgrounds.

6.D Communal Garden

INGLEWOOD COMMUNITY GARDEN

Communal gardening began in the Inglewood Community Garden in 2007 when the parcel of land [0.388 acre / 0.157 hectare] – previously the site of a navigation beacon – was decommissioned by Transport Canada and originally leased via the City and the Inglewood Community Association to the Garden Path Society (now the Inglewood Community Garden).

The trick with communal gardening, apparently, is to have a commune that does the gardening. This is where you, the volunteer and you, the rental plot gardener come in.

Building on the work already done by previous communal gardeners and volunteers, operations in the communal garden remain focused on two goals:

1. To organize available human and material resources efficiently in order to plant, maintain and harvest the produce to fulfil the commitment of our Mission Statement.
2. To improve the infrastructure of the communal garden so that next year there is less development and maintenance and more gardening and the year after that even less development and maintenance and even more gardening and at some point in the near term that there is very little development, very little maintenance and almost all gardening.

6.E Water for the Plot Rental Garden

INGLEWOOD COMMUNITY GARDEN

Water is supplied by the City of Calgary Parks Department from the same system which supplies the city's residential drinking water: **"Thank you"** City of Calgary Parks Department!

Please note the following:

1. **BE CAREFUL!** Water "pressure" in the Garden is very high!
2. Always hold and point the hose nozzle away from yourself and others when turning it on.
3. The "Water Stand" locations are indicated in the diagram above and they should be pretty easy to find in the garden as they consist of an upright timber supporting a hose.
4. The valves (taps) for the water stands are at ground level.
5. Once you are finished watering please turn off the water using the tap at ground level, then open the nozzle and **drain water from the hose**, then close nozzle to store

TIP – There is a trick to rolling up the hose; here's a way to make it easier:

- Leave the nozzle on just a trickle and
- Turn off the water at the tap
- Once the hose stops running it is more flexible and easier to handle

6.F Water Stand

PICTURE REQUIRED

TEXT REQUIRED

6.G Water in the Communal Garden

INGLEWOOD COMMUNITY GARDEN

- There are 5 water stands in the Communal Garden.
- Hand watering in the Communal Garden is particularly necessary at the beginning of the growing season and frequently thereafter.

Well, well...

- There are 2 wells in the Communal Garden. These are "ground water sample wells" and do not provide any usable water... just thought that you'd like to know.

6.H Maintenance Shed

INGLEWOOD COMMUNITY GARDEN

The Maintenance Shed is the pretty much the only "limited access" area in the Garden.

As noted elsewhere:

"As a safety precaution the Maintenance Shed lock has a different combination because it houses power tools and heavier equipment not required for casual gardening use."

However, while access to the Maintenance Shed is limited it is not exclusive. If you find yourself working on any of the numerous teams / crews whose projects require power tools or heavy hand tools you'll be given access or told the "secret numbers."

In fact, if you have need of any of the tools or equipment stored in the Maintenance Shed you are welcome to its use. All you need do is contact us, to arrange access.

M a i n t e n a n c e

info@inglewoodcommunitygarden.ca

6.I Communal Garden Shed

INGLEWOOD COMMUNITY GARDEN

The Communal Garden Shed contains (among other things)...

1. **First Aid Kit**
2. Volunteer Log Book
3. Sacking, cardboard sheets, row cover, sheets (cloth and plastic), stacks of newspaper and magazines, potting trays and cups
4. Hand tools: trowels
5. Weigh Scales: used to record harvests (to be donated or for volunteers)
6. Gloves: pairs, mismatched and unaccompanied
7. Folding tables

Tools such as shovels, hoes, rakes and spade forks can be found in the wooden locker on the north east corner of the Communal Garden Shed, whose combination lock opens to the same combination as the gates and Plot Rental Tool Shed.

Note: First Aid Kits **DO NOT** contain an epinephrine injector!

6.J Greenhouses

INGLEWOOD COMMUNITY GARDEN

There are two green houses near the centre of the Garden.

Typically the green houses have been used to acclimatize seedlings in Spring and then to grow any variety of indoor plants depending upon the Communal Garden Planting Plant for that year.

6.K Tool Shed

INGLEWOOD COMMUNITY GARDEN

<https://inglewoodcommunitygarden.ca/wp-content/uploads/2019-ICG-Mulch-00.pdf>

The Tool Shed contains (among other things)...

1. **First Aid Kit**
2. Hand tools such as trowels, shovels, rakes
3. A limited number of construction tools: hammer, screw drivers, pliers
4. Gardening miscellany such as gloves, twine, garbage bags, etc.

Returning tools to their proper places and attempting to maintain a modicum of order will go a long way to help keep the shed organized. Thank you.

Note: First Aid Kits **DO NOT** contain an epinephrine injector!

6.L Mulch Store and Bulk Drop Off

INGLEWOOD COMMUNITY GARDEN

The Mulch Store / Drop off zone is located in the communal garden where the west side vehicle gateway opens onto the garden.

The size of the piles stored here waxes and wanes and depending upon the constituent composition of the mulch can be surprisingly and pleasantly odiferous in hot weather.

The mulch stored in this location has already been allocated to one project or another in the garden and, as such, is **not** available upon demand to the gardening public.

However, if you are in need of mulch please do not hesitate to contact the Garden and we shall see if an adequate supply can be arranged for you.

6.M Porta Potty

INGLEWOOD COMMUNITY GARDEN

The Porta-Potty is located adjacent to the fence at the southeast corner of the Garden.

The Porta-Potty is secured with a combination lock. The combination is the same as that of the other locks in the Garden.

Please help to keep the Porta-Potty as clean and tidy as possible. Thank you.

7.B How to improve this guide

Improving this guide **should** be easy! All **you** have to do is correct, clarify or simplify any one (or all!?) of the statements, sections or pages in it and send along your edits.

Similarly, ideas for alterations to the figures and illustrations, as well as, suggestions for additional text, figures or illustrations are welcome. Please contact us at the following email address:

Input via email

info@inglewoodcommunitygarden.ca

7.C Acknowledgements

The author, on behalf of the Inglewood Community Garden, its board of directors, gardeners and volunteers, would like to thank the following:

- The Victoria Park Gardeners who started the Victoria Park Garden and then physically moved it to Inglewood in 2003.
- The Garden Path Society of Calgary for establishing and developing the Garden.
- Parks Calgary for their support since the very beginning!
- The Inglewood Community Association for being such a very good neighbour.
- The hundreds of volunteers who have literally built the Inglewood Community Garden.
- The Community of Inglewood for being the Best Neighbours and the Best Neighbourhood in Canada!... circa 2014 by the Canadian Institute of Planners and circa forever by us!! =:)
- The Board of Directors and cadre of fiercely dedicated volunteers who maintain the Inglewood Community Garden's immaculate condition and the associations with the community partners that define what the ICG's role as a truly "community" garden.
